

2025/66

16.1.2025

COMMISSION IMPLEMENTING REGULATION (EU) 2025/66

of 13 January 2025

operating deductions from fishing quotas available for certain stocks in 2024 on account of overfishing of other stocks in the previous years and amending Implementing Regulation (EU) 2024/2407

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Regulation (EC) No 1224/2009 of 20 November 2009 establishing a Union control system for ensuring compliance with the rules of the common fisheries policy, amending Regulations (EC) No 847/96, (EC) No 2371/2002, (EC) No 811/2004, (EC) No 768/2005, (EC) No 2115/2005, (EC) No 2166/2005, (EC) No 388/2006, (EC) No 509/2007, (EC) No 676/2007, (EC) No 1098/2007, (EC) No 1300/2008, (EC) No 1342/2008 and repealing Regulations (EEC) No 2847/93, (EC) No 1627/94 and (EC) No 1966/2006 ⁽¹⁾, and in particular Article 105 (1), (2), (3) and (5) thereof,

Whereas:

- (1) Fishing quotas for the year 2023 have been established by Council Regulations (EU) 2022/2090 ⁽²⁾, (EU) 2023/194 ⁽³⁾ and (EU) 2023/195 ⁽⁴⁾.
- (2) Fishing quotas for the year 2024 have been established by Council Regulations (EU) 2023/194, (EU) 2023/2638 ⁽⁵⁾, (EU) 2024/257 ⁽⁶⁾ and (EU) 2024/259 ⁽⁷⁾.
- (3) Pursuant to Article 105(1) of Regulation (EC) No 1224/2009, when the Commission has established that a Member State has exceeded the fishing quotas which have been allocated to it, the Commission is to operate deductions from future fishing quotas of that Member State.
- (4) Commission Implementing Regulation (EU) 2024/2407 ⁽⁸⁾ has established deductions from fishing quotas available for certain fish stocks in 2024 on account of overfishing in the previous years.
- (5) For certain Member States, namely Denmark, Spain, the Netherlands, Poland and Portugal, certain deductions could not be operated by Implementing Regulation (EU) 2024/2407 from fishing quotas allocated for the overfished stocks because quotas for these stocks are not available for those Member States in the year 2024.

⁽¹⁾ OJ L 343, 22.12.2009, p. 1, ELI: <http://data.europa.eu/eli/reg/2009/1224/oj>.

⁽²⁾ Council Regulation (EU) 2022/2090 of 27 October 2022 fixing the fishing opportunities for certain fish stocks and groups of fish stocks applicable in the Baltic Sea for 2023 and amending Regulation (EU) 2022/109 as regards certain fishing opportunities in other waters (OJ L 281, 31.10.2022, p. 1, ELI: <http://data.europa.eu/eli/reg/2022/2090/oj>).

⁽³⁾ Council Regulation (EU) 2023/194 of 30 January 2023 fixing for 2023 the fishing opportunities for certain fish stocks, applicable in Union waters and, for Union fishing vessels, in certain non-Union waters, as well as fixing for 2023 and 2024 such fishing opportunities for certain deep-sea fish stocks (OJ L 28, 31.1.2023, p. 1, ELI: <http://data.europa.eu/eli/reg/2023/194/oj>).

⁽⁴⁾ Council Regulation (EU) 2023/195 of 30 January 2023 fixing for 2023 the fishing opportunities for certain stocks and groups of fish stocks applicable in the Mediterranean and Black Seas and amending Regulation (EU) 2022/110 as regards the fishing opportunities for 2022 applicable in the Mediterranean and the Black Seas (OJ L 28, 31.1.2023, p. 220, ELI: <http://data.europa.eu/eli/reg/2023/195/oj>).

⁽⁵⁾ Council Regulation (EU) 2023/2638 of 20 November 2023 fixing the fishing opportunities for certain fish stocks and groups of fish stocks applicable in the Baltic Sea for 2024 and amending Regulation (EU) 2023/194 as regards certain fishing opportunities in other waters (OJ L, 2023/2638, 22.11.2023, ELI: <http://data.europa.eu/eli/reg/2023/2638/oj>).

⁽⁶⁾ Council Regulation (EU) 2024/257 of 10 January 2024 fixing for 2024, 2025 and 2026 the fishing opportunities for certain fish stocks, applicable in Union waters and, for Union fishing vessels, in certain non-Union waters, and amending Regulation (EU) 2023/194 (OJ L, 2024/257, 11.1.2024, ELI: <http://data.europa.eu/eli/reg/2024/257/oj>).

⁽⁷⁾ Council Regulation (EU) 2024/259 of 10 January 2024 fixing for 2024 the fishing opportunities for certain fish stocks and groups of fish stocks applicable in the Mediterranean and Black Seas (OJ L, 2024/259, 11.1.2024, ELI: <http://data.europa.eu/eli/reg/2024/259/oj>).

⁽⁸⁾ Commission Implementing Regulation (EU) 2024/2407 of 13 September 2024 operating deductions from fishing quotas available for certain stocks in 2024 on account of overfishing in the previous years (OJ L, 2024/2407, 16.9.2024, ELI: http://data.europa.eu/eli/reg_impl/2024/2407/oj).

- (6) Article 105(5) of Regulation (EC) No 1224/2009 provides that, if it is not possible to operate deductions on the overfished stock in the year following the overfishing because the Member State concerned has no available quota for that fish stock, deductions may be operated on other stocks in the same geographical area or with the same commercial value, following consultations with the Member State concerned.
- (7) According to point 4 of the Communication from the Commission on guidelines for the deduction of quotas under Article 105(1), (2) and (5) of Regulation (EC) No 1224/2009 ⁽⁹⁾ ('the Guidelines'), such deductions should be preferably operated from quotas allocated for stocks fished by the same fleet as the fleet that overfished the quota.
- (8) The Member States concerned have been consulted as regards certain deductions from fishing quotas allocated for stocks other than those which have been overfished. It is therefore appropriate to operate deductions from those alternative fishing quotas allocated to those Member States in 2024.
- (9) In certain cases, exchanges of fishing opportunities concluded in accordance with Article 16(8) of Regulation (EU) No 1380/2013 of the European Parliament and of the Council ⁽¹⁰⁾ enabled full or partial deductions from the same stocks in the framework of Implementing Regulation (EU) 2024/2407.
- (10) Moreover, certain deductions provided for by Implementing Regulation (EU) 2024/2407 exceed the adapted quotas available in the year 2024 and, as a consequence, cannot be entirely operated in that year. In those cases, according to point 2 of the Guidelines, the deductions have been operated to the full extent of the available quota and the remaining amounts should be deducted from the adapted quota available in subsequent years until the full overfished amount is paid back.
- (11) In 2023, Germany overfished its quota for other species in Norwegian waters of 1 and 2 (OTH/1N2AB.) by 1,320 tonnes. Additionally, a deduction of 19,997 tonnes remains following the overfishing, by Germany, of its quota for OTH/1N2AB. in 2022, in accordance with point 2 of the Guidelines. By electronic mail dated 1 July 2024, Germany requested to spread the due deduction, namely 21,317 tonnes, over three years. Considering that, in accordance with point 3(b) of the Guidelines, a slower payback may be exceptionally possible where the stock concerned is caught in a mixed fishery and a significant loss of quota would prevent the exploitation of the associated species in that mixed fishery catch, this request can be accepted. Therefore, the annual deductions applicable to the German quota for OTH/1N2AB. amount to 7,106 tonnes in 2024 and 2025 and to 7,105 tonnes in 2026, without prejudice to any further quota adaptation.
- (12) Following changes in the stock area definition set up in Regulation (EU) 2024/257, the deduction applicable to Denmark for the overfishing of haddock in Union waters of 3a (HAD/*03A-C) in the year 2023 should now be applied on the 2024 quota for haddock in area 3a (HAD/*03A.).
- (13) Point 1 of the Guidelines states that, where applicable, the timeline for deductions in case of overfishing of a quota for stocks managed by regional fisheries management organisations is to be adapted to the timeline for deductions set in the regional fisheries management organisations concerned for these stocks. Recommendation 22-03 by the International Commission for the Conservation of Atlantic Tunas (ICCAT) for the conservation of North Atlantic swordfish ⁽¹¹⁾ provides that any excess of the annual adjusted quota in the year 2023 is to be deducted from the quota/catch limit for 2025. On this basis, deductions – including those resulting from applicable multiplying factors – on account of the overfishing in 2023 for the stock of swordfish in the Atlantic Ocean, north of 5° N (SWO/AN05N), managed by ICCAT, should be applied in 2025. Consequently, the deduction established by Implementing Regulation (EU) 2024/2407 on account of the overfishing in 2023, by Portugal, of its quota for SWO/AN05N should be operated on its quota for 2025. Furthermore, the deduction to operate on account of the overfishing, in 2023, by France of the quota allocated to 'Other Member States' – including France – exclusively for the by-catches of swordfish in the Atlantic Ocean, north of 5° N (SWO/AN05N_AMS) should be operated on the quota allocated to France for 2025.

⁽⁹⁾ Communication from the Commission on guidelines for the deduction of quotas under Article 105(1), (2) and (5) of Regulation (EC) No 1224/2009, and replacing Communication 2012/C 72/07 (2022/C 369/03) (OJ C 369, 27.9.2022, p. 3).

⁽¹⁰⁾ Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy, amending Council Regulations (EC) No 1954/2003 and (EC) No 1224/2009 and repealing Council Regulations (EC) No 2371/2002 and (EC) No 639/2004 and Council Decision 2004/585/EC (OJ L 354, 28.12.2013, p. 22, ELI: <http://data.europa.eu/eli/reg/2013/1380/oj>).

⁽¹¹⁾ Recommendation 22-03 by ICCAT replacing supplemental recommendation 21-02 extending and amending Recommendation 17-02 for the conservation of North Atlantic swordfish (<https://www.iccat.int/Documents/Recs/compendiopdf-e/2022-03-e.pdf>).

- (14) Similarly, Recommendation 19-05 by ICCAT establishing a rebuilding programme for blue marlin ⁽¹²⁾ provides that any excess of the annual landings limits fixed for the year 2023 is to be deducted from the landings limits during 2025. Therefore, the deduction set by Implementing Regulation (EU) 2024/2407 on account of the overfishing in 2023, by Spain, of its quota for the stock of blue marlin in the Atlantic Ocean (BUM/ATLANT) should be applied on its quota for 2025.
- (15) In Implementing Regulation (EU) 2024/2407, a typographic error occurred as regards the amount of the deduction applicable on account of the overfishing, by Poland, of the quota for mackerel in Union waters of 3a, 3b, 3c and 3d; United Kingdom waters of 2a; Union and United Kingdom waters of 4; Norwegian waters of 2a and 4a (MAC/2A34-N). The amount to be deducted should read 636,225 instead of 636,275 tonnes.
- (16) Implementing Regulation (EU) 2024/2407 should therefore be amended accordingly.
- (17) Further updates or corrections may still occur following the detection, for the current or previous exercises, of errors, omissions or misreporting in the catch figures declared by the Member States pursuant to Article 33 of Regulation (EC) No 1224/2009,

HAS ADOPTED THIS REGULATION:

Article 1

The fishing quotas fixed for the year 2024 in Regulations (EU) 2023/194, (EU) 2023/2638, (EU) 2024/257 and (EU) 2024/259, referred to in Annex I to this Regulation shall be reduced by applying the deductions on the alternative stocks set out in that Annex.

Article 2

The Annex to Implementing Regulation (EU) 2024/2407 is replaced by the text set out in Annex II to this Regulation.

Article 3

This Regulation shall enter into force on the seventh day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 13 January 2025.

For the Commission
The President
Ursula VON DER LEYEN

⁽¹²⁾ Recommendation 19-05 by ICCAT to establish rebuilding programmes for blue marlin and white marlin/roundscale spearfish (<https://www.iccat.int/Documents/Recs/compendiopdf-e/2019-05-e.pdf>).

ANNEX I

DEDUCTIONS FROM FISHING QUOTAS FOR THE YEAR 2024 TO BE APPLIED ON ALTERNATIVE STOCKS

OVERFISHED STOCKS						ALTERNATIVE STOCKS						
Member State	Species code	Area code	Species name	Area name	Quantity that cannot be deducted from the 2024 fishing quota for the overfished stock (in tonnes)		Member State	Species code	Area code	Species name	Area name	Quantity to be deducted from the 2024 fishing quota for the alternative stocks (in tonnes)

⁽¹⁾ Quotas available to a Member State pursuant to the relevant fishing opportunities Regulations after taking into account exchanges of fishing opportunities in accordance with Article 16(8) of Regulation (EU) No 1380/2013, quota transfers from 2022 to 2023 in accordance with Article 4(2) of Council Regulation (EC) No 847/96 of 6 May 1996 introducing additional conditions for year-to-year management of TACs and quotas (OJ L 115, 9.5.1996, p. 3, ELI: <http://data.europa.eu/eli/reg/1996/847/oj>) or with Article 15(9) of Regulation (EU) No 1380/2013, reallocation and deduction of fishing opportunities in accordance with Articles 37 and 105 of Regulation (EC) No 1224/2009.

⁽²⁾ As set out in Article 105(2) of Regulation (EC) No 1224/2009. Deduction equal to the overfishing * 1,00 shall apply in all cases of overfishing equal to, or less than, 100 tonnes.

⁽³⁾ As set out in Article 105(3) of Regulation (EC) No 1224/2009 and provided that the extent of overfishing exceeds 10 %.

⁽⁴⁾ Letter “A” indicates that an additional multiplying factor of 1,5 has been applied due to consecutive overfishing in the years 2021, 2022 and 2023. Letter “C” indicates that an additional multiplying factor of 1,5 has been applied as the stock is subject to a multiannual plan.

⁽⁵⁾ Remaining quantities from previous year(s).

⁽⁶⁾ Deductions to operate in 2024.

⁽⁷⁾ Deductions to operate in 2024 that could be actually applied considering the available quota on 23 September 2024.

⁽⁸⁾ To spread over the years 2025 (7,106 tonnes) and 2026 (7,105 tonnes) following Germany’s request to equally spread the deduction of 21,317 tonnes due in 2024 over three years (2024, 2025 and 2026).

⁽⁹⁾ To be deducted from the quota for haddock in 3a (HAD/*03A.) following a change in the stock code and area definition.

⁽¹⁰⁾ Additional multiplying factor not applicable because the overfishing does not exceed 10 % of the permitted landings.

⁽¹¹⁾ To be deducted in 2025 in line with relevant ICCAT Recommendation.

⁽¹²⁾ As Article 4(2) of Regulation (EC) No 847/96 is not applicable to this stock, this unused quantity cannot be utilised to reduce the deduction due in 2024.

⁽¹³⁾ By-catch quota available to “Other Member States” among which France.

⁽¹⁴⁾ On account of overfishing in 2022 in accordance with the deduction timeline set by Recommendation 22-01 by ICCAT establishing that the overage of the annual catch limit for bigeye tuna in 2022 shall be deducted from the annual catch limit for 2024.

⁽¹⁵⁾ On account of overfishing in 2022 in accordance with the deduction timeline set by Recommendation 22-03 by ICCAT establishing that any excess of the annual adjusted quota in 2022 shall be deducted from the respective quota/catch limit for 2024.’
