

COMMISSION IMPLEMENTING DECISION (EU) 2025/640

of 25 March 2025

amending Implementing Decision (EU) 2024/2207 concerning certain emergency measures relating to sheep pox and goat pox in Greece

(notified under document C(2025) 1941)

(Only the Greek text is authentic)

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EU) 2016/429 of the European Parliament and of the Council of 9 March 2016 on transmissible animal diseases and amending and repealing certain acts in the area of animal health ('Animal Health Law') ⁽¹⁾, and in particular Article 259(1), thereof,

Whereas:

- (1) Sheep pox and goat pox is an infectious viral disease affecting caprine and ovine animals and it can have a severe impact on the concerned animal population and the profitability of farming causing disturbance to movements of consignments of those animals and products thereof within the Union and exports to third countries.
- (2) In the event of an outbreak of sheep pox and goat pox in caprine or ovine animals, there is a serious risk of the spread of that disease to other establishments of caprine or ovine animals.
- (3) Commission Delegated Regulation (EU) 2020/687 ⁽²⁾ supplements the rules for the control of the listed diseases referred to in Article 9(1), points (a), (b) and (c), of Regulation (EU) 2016/429, and defined as category A, B and C diseases in Commission Implementing Regulation (EU) 2018/1882 ⁽³⁾. In particular, Articles 21 and 22 of Delegated Regulation (EU) 2020/687 provide for the establishment of a restricted zone in the event of an outbreak of a category A disease, including sheep pox and goat pox, and for certain measures to be applied therein. Article 21(1) of that Delegated Regulation provides that the restricted zone is to comprise a protection zone, a surveillance zone, and, if necessary, further restricted zones around or adjacent to the protection and surveillance zones.
- (4) In order to address outbreaks of sheep pox and goat pox in Greece, notified in August 2024, the Commission adopted Commission Implementing Decision (EU) 2024/2207 ⁽⁴⁾, which lays down certain emergency measures relating to that disease in Greece. More particularly, it provides that the protection, surveillance, and further restricted zones to be established by that Member State, in accordance with Delegated Regulation (EU) 2020/687, are to comprise at least the areas listed in the Annex to that Implementing Decision.

⁽¹⁾ OJ L 84, 31.3.2016, p. 1, ELI: <http://data.europa.eu/eli/reg/2016/429/oj>.

⁽²⁾ Commission Delegated Regulation (EU) 2020/687 of 17 December 2019 supplementing Regulation (EU) 2016/429 of the European Parliament and the Council, as regards rules for the prevention and control of certain listed diseases (OJ L 174, 3.6.2020, p. 64, ELI: http://data.europa.eu/eli/reg_del/2020/687/oj).

⁽³⁾ Commission Implementing Regulation (EU) 2018/1882 of 3 December 2018 on the application of certain disease prevention and control rules to categories of listed diseases and establishing a list of species and groups of species posing a considerable risk for the spread of those listed diseases (OJ L 308, 4.12.2018, p. 21, ELI: http://data.europa.eu/eli/reg_impl/2018/1882/oj).

⁽⁴⁾ Commission Implementing Decision (EU) 2024/2207 of 29 August 2024 concerning certain emergency measures relating to sheep pox and goat pox in Greece (OJ L, 2024/2207, 30.8.2024, ELI: http://data.europa.eu/eli/dec_impl/2024/2207/oj).

- (5) Since the last amendment of Implementing Decision (EU) 2024/2207, Greece has notified the Commission of six new outbreaks of sheep pox and goat pox in establishments where ovine and caprine animals were kept, in the regional units of Thessaloniki, Aetolia–Acarnania, and Phocis, as well as on the island of Samothrace in the regional unit of Evros.
- (6) Therefore, the areas listed as protection, surveillance, and further restricted zones for Greece in the Annex to Implementing Decision (EU) 2024/2207, as well as the duration of the measures applicable therein, should be adjusted in order to prevent the further spread of the disease in Greece and to the rest of the Union. Accordingly, it is necessary to amend the list of restricted zones, and the duration of the measures to be applied therein, set out in the Annex to that Implementing Decision.
- (7) The size of the protection, surveillance, and further restricted zones, and the duration of the measures to be applied therein, is based on the criteria set out in Article 64(1) of Regulation (EU) 2016/429, as well as the rules laid down in Delegated Regulation (EU) 2020/687. The criteria applied for the choice of the size of the protection, surveillance, and further restricted zones, as well as of the duration of the measures to be applied therein, include a consideration of not only the epidemiological situation as regards sheep pox and goat pox in the areas affected by that disease, but also of the overall epidemiological situation of sheep pox and goat pox in the entire territory of the Member State concerned by that disease, as well as the level of risk for the further spread of the disease. The chosen duration of the measures has also taken into account the international standards of the Terrestrial Animal Health Code of the World Organisation for Animal Health ⁽³⁾. In the current epidemiological situation, there is a high risk of the further spread of the disease, as an outbreak appeared in the regional unit of Thessaloniki, outside the limits of the restricted zone currently in place and outbreaks continue to be reported in the regional units of Aetolia–Acarnania and Phocis more than four months since the reports of the first outbreaks in those regional units, as well as on the island of Samothrace in the regional unit of Evros, more than two months since the report of the first outbreak on this island, a fact suggesting that the disease continues to circulate, in spite of the measures already put in place.
- (8) In addition, in view of the occurrence of the six new outbreaks of sheep pox and goat pox in Greece during the past two weeks, it is also necessary to prolong the prohibition on the movements of sheep and goats from the entire territory of Greece, to a destination located outside Greece until 31 May 2025, in order to avoid the spread of the disease to the rest of the Union and to third countries, as well as any unjustified barriers to trade being imposed by third countries.
- (9) Taking into account the current epidemiological situation in the Union as regards sheep pox and goat pox, the period of application of Implementing Decision (EU) 2024/2207 should be prolonged until 15 December 2025.
- (10) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

Article 1

Amendments to Implementing Decision (EU) 2024/2207

Implementing Decision (EU) 2024/2207 is amended as follows:

- (1) in Article 3, point (e), the date ‘15 May 2025’ is replaced by ‘31 July 2025’;
- (2) in Article 4, the date ‘30 September 2025’ is replaced by ‘15 December 2025’;
- (3) the Annex is replaced by the text set out in the Annex to this Decision.
