

2025/1053

28.5.2025

COMMISSION DECISION (EU) 2025/1053

of 19 May 2025

on the consistency of the performance targets included in the draft performance plan submitted by the Czech Republic pursuant to Regulation (EC) No 549/2004 of the European Parliament and of the Council with the Union-wide performance targets for the fourth reference period of the Single European Sky performance and charging scheme

(notified under document C(2025) 2924)

(Only the Czech text is authentic)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 549/2004 of the European Parliament and of the Council of 10 March 2004 laying down the framework for the creation of the single European sky (the framework Regulation) ⁽¹⁾, and in particular Article 11(3) point (c) thereof,

Having regard to Regulation (EU) 2024/2803 of the European Parliament and of the Council of 23 October 2024 on the implementation of the Single European Sky ⁽²⁾, and in particular Article 58(3) thereof,

Having regard to Commission Implementing Regulation (EU) 2019/317 of 11 February 2019 laying down a performance and charging scheme in the single European sky and repealing Implementing Regulations (EU) No 390/2013 and (EU) No 391/2013 ⁽³⁾, and in particular Article 14(2) thereof,

Whereas:

GENERAL CONSIDERATIONS

- (1) Pursuant to Article 11 of Regulation (EC) No 549/2004, Member States are to draw up plans, either at national level or at the level of functional airspace blocks ('FABs'), including performance targets, for each reference period of the performance and charging scheme for air navigation services and network functions. Those plans are to include local performance targets which are consistent with the Union-wide performance targets for the reference period concerned.
- (2) The Union-wide performance targets for the fourth reference period ('RP4', 2025-2029) were set out in Commission Implementing Decision (EU) 2024/1688 ⁽⁴⁾.
- (3) All Member States have drawn up and adopted draft performance plans for RP4, which were submitted to the Commission for assessment by 1 October 2024. Following the verification of completeness of those draft performance plans, the Commission requested Member States to submit updated draft performance plans by 15 November 2024.
- (4) The Commission's assessment presented in this Decision is based on the updated draft performance plan for RP4 submitted by the Czech Republic ('the draft performance plan').
- (5) The Performance Review Body ('PRB'), assisting the Commission in the implementation of the performance scheme, has submitted to the Commission a report containing its advice on the assessment of the draft performance plans.

⁽¹⁾ OJ L 96, 31.3.2004, p. 1, ELI: <http://data.europa.eu/eli/reg/2004/549/oj>.

⁽²⁾ OJ L, 2024/2803, 11.11.2024, ELI: <http://data.europa.eu/eli/reg/2024/2803/oj>.

⁽³⁾ OJ L 56, 25.2.2019, p. 1, ELI: http://data.europa.eu/eli/reg_impl/2019/317/oj.

⁽⁴⁾ Commission Implementing Decision (EU) 2024/1688 of 12 June 2024 setting Union-wide performance targets for the air traffic management network for the fourth reference period from 1 January 2025 to 31 December 2029 (OJ L, 2024/1688, 17.6.2024, ELI: http://data.europa.eu/eli/dec_impl/2024/1688/oj).

- (6) In accordance with Article 14(1) of Implementing Regulation (EU) 2019/317, the Commission has assessed the consistency of the local performance targets included in the draft performance plan on the basis of the criteria laid down in point 1 of Annex IV to that Implementing Regulation, and taking account of local circumstances where relevant.
- (7) The Commission has complemented its assessment of the draft performance plan with a review of the elements set out in point 2 of Annex IV to that Implementing Regulation. In respect of point 2.1(d)(vii) of Annex IV to Implementing Regulation (EU) 2019/317, the Commission notes that it has not conducted, as part of that review, a detailed analysis of the methodology used by the Czech Republic for the allocation of costs between *en route* and terminal services in RP4. Therefore, the Commission has not drawn any conclusions, at this stage, in respect of the compliance of that cost allocation methodology with points (e) and (f) of Article 15(2) Regulation (EC) No 550/2004 of the European Parliament and of the Council⁽⁵⁾ and Article 22(5) of Implementing Regulation (EU) 2019/317.

COMMISSION ASSESSMENT

Assessment of the safety targets

- (8) As regards the key performance area of safety, the consistency of the targets included in the draft performance plan has been assessed in accordance with point 1.1 of Annex IV to Implementing Regulation (EU) 2019/317.
- (9) The performance targets in the key performance area of safety proposed by the Czech Republic in respect of the effectiveness of safety management, broken down per safety management objective and expressed as a level of implementation, are as follows:

The Czech Republic	Targets on the effectiveness of safety management, expressed as a level of implementation, ranging from EASA level A to D					
Air navigation service provider	Safety management objective	2025	2026	2027	2028	2029
ANS CR	Safety policy and objectives	C	C	C	C	C
	Safety risk management	C	C	C	C	D
	Safety assurance	B	C	C	C	C
	Safety promotion	C	C	C	C	C
	Safety culture	C	C	C	C	C

- (10) The Commission has found that the safety performance targets proposed by the Czech Republic for the air navigation service provider 'ANS CR' are equal to the Union wide targets for each calendar year of RP4 for three of the 'safety management objectives', whilst the 'safety assurance' objective is planned to be achieved from 2026, and the 'safety risk management' objective is planned to be achieved in 2029.
- (11) The Commission notes that the draft performance plan sets out measures for ANS CR for the achievement of the local safety targets, such as the implementation of redesigned emergency response processes, enhanced safety monitoring and training, and updated exercises within safety assurance.

⁽⁵⁾ Regulation (EC) No 550/2004 of the European Parliament and of the Council of 10 March 2004 on the provision of air navigation services in the single European sky (the service provision Regulation) (OJ L 96, 31.3.2004, p. 10, ELI: <http://data.europa.eu/eli/reg/2004/550/oj>).

- (12) On the basis of the findings set out in recitals (9), (10) and (11) and considering that the Union-wide safety performance targets set in Implementing Decision (EU) 2024/1688 must be achieved by the final year of RP4, that is, 2029, the local safety performance targets included in the draft performance plan should be considered consistent with the Union-wide performance targets.

Assessment of the environment targets

- (13) As regards the key performance area of environment, the consistency of the targets included in the draft performance plan regarding the average horizontal *en route* flight efficiency of the actual trajectory has been assessed based on the criterion laid down in point 1.2 of Annex IV to Implementing Regulation (EU) 2019/317. Accordingly, the proposed environment targets of the Czech Republic have been compared to the relevant *en route* horizontal flight efficiency reference values set out in the European Route Network Improvement Plan (‘ERNIP’), drawn up in accordance with Annex I to Commission Implementing Regulation (EU) 2019/123 ⁽⁶⁾ and available at the time of adopting the Union-wide performance targets for RP4, that is on 2 July 2024.
- (14) The environment performance targets proposed by the Czech Republic for RP4 and the corresponding national reference values from the ERNIP, expressed as the average horizontal *en route* flight efficiency of the actual trajectory, are as follows:

The Czech Republic	2025	2026	2027	2028	2029
Targets in the key performance area of environment , expressed as the average horizontal <i>en route</i> flight efficiency of the actual trajectory	2,54 %	2,52 %	2,49 %	2,45 %	2,43 %
Reference values	2,54 %	2,52 %	2,49 %	2,45 %	2,43 %

- (15) The Commission observes that the environment targets proposed by the Czech Republic are equal to the corresponding national reference values for each calendar year of RP4.
- (16) The Commission notes that the Czech Republic has presented in the draft performance plan measures for the achievement of the local environment targets which include the further expansion of cross-border operations and the implementation of an improved airspace sectorisation.
- (17) On the basis of the findings set out in recitals (14), (15) and (16), the targets in the key performance area of environment included in the draft performance plan should be considered consistent with the Union-wide performance targets for RP4.

Assessment of the capacity targets

- (18) Concerning the key performance area of capacity, the consistency of the targets included in the draft performance plan regarding the average *en route* air traffic flow management (‘ATFM’) delay per flight has been assessed based on the criterion laid down in point 1.3 of Annex IV to Implementing Regulation (EU) 2019/317. Accordingly, the proposed *en route* capacity targets of the Czech Republic have been compared to the relevant reference values set out in the Network Operations Plan drawn up in accordance with Article 9 of Commission Implementing Regulation (EU) 2019/123 and available at the time of adopting the Union-wide performance targets for RP4, that is on 2 July 2024.

⁽⁶⁾ Commission Implementing Regulation (EU) 2019/123 of 24 January 2019 laying down detailed rules for the implementation of air traffic management (ATM) network functions and repealing Commission Regulation (EU) No 677/2011 (OJ L 28, 31.1.2019, p. 1, ELI: http://data.europa.eu/eli/reg_impl/2019/123/oj).

- (19) The *en route* capacity targets proposed by the Czech Republic for RP4, expressed in minutes of ATFM delay per flight, and the corresponding reference values from the Network Operations Plan, are as follows:

The Czech Republic	2025	2026	2027	2028	2029
Targets in the key performance area of capacity , expressed in minutes of <i>en route</i> ATFM delay per flight	0,19	0,14	0,11	0,10	0,10
Reference values	0,19	0,14	0,11	0,10	0,10

- (20) The Commission observes that the *en route* capacity targets proposed by the Czech Republic are equal to the corresponding national reference values for each calendar year of RP4.
- (21) The Commission notes that the Czech Republic has presented, in the draft performance plan, measures for the achievement of its *en route* capacity targets. Those measures include the recruitment and training of air traffic controllers, the optimisation of sector opening times, the implementation of an improved airspace sectorisation and the further development of the air traffic management system.
- (22) On the basis of the findings set out in recitals (19), (20) and (21), the targets in the key performance area of capacity included in the draft performance plan should be considered consistent with the Union-wide performance targets for RP4.

Review of the capacity targets for terminal air navigation services

- (23) In accordance with point 2.1(b) of Annex IV to Implementing Regulation (EU) 2019/317, the Commission the Commission has complemented its assessment of the draft performance plan by reviewing the capacity performance targets for terminal air navigation services set in respect of the airports referred to in Articles 1(3) and (4) of that Implementing Regulation. It was found that those targets give rise to concerns.
- (24) The Commission notes that the proposed terminal capacity targets for RP4 lead to a significant deterioration of the average arrival ATFM delay per year compared to the third reference period ('RP3'). Indeed, the proposed RP4 targets are set at 0,40 minute per flight, whereas the actual performance recorded during RP3 ranged from 0,01 to 0,15 minute per flight.
- (25) Therefore, the Commission considers that, in connection with the adoption of its final performance plan in accordance with Article 16, point (a) of Implementing Regulation (EU) 2019/317, the Czech Republic should further justify the terminal capacity targets for RP4 in light of the observations set out in recital (24) or should revise downwards those targets.

Assessment of the cost-efficiency targets

- (26) As regards the key performance area of cost-efficiency, the consistency of the targets included in the draft performance plan regarding the determined unit cost ('DUC') for *en route* air navigation services has been assessed based on the criteria laid down in points 1.4(a), (b) and (c) of Annex IV to Implementing Regulation (EU) 2019/317. Those criteria consist of the DUC trend over RP4, the long-term DUC trend over RP3 and RP4 (2020-2029), and the baseline value for the DUC at charging zone level compared with the average value of the charging zones where air navigation service providers have a similar operational and economic environment.

- (27) The *en route* cost-efficiency targets proposed by the Czech Republic for RP4, and the related baseline values, are as follows:

<i>En route</i> charging zone of the Czech Republic	2019 baseline value	2024 baseline value	2025	2026	2027	2028	2029
Targets and baseline values in the key performance area of cost-efficiency, expressed as determined unit cost (in real terms at 2022 prices)	CZK 1 315,2	CZK 1 425,1	CZK 1 426,6	CZK 1 425,3	CZK 1 393,9	CZK 1 383,9	CZK 1 336,2
	EUR 53,62	EUR 58,10	EUR 58,16	EUR 58,11	EUR 56,82	EUR 56,42	EUR 54,47

- (28) Concerning the assessment criterion set out in point 1.4(a) of Annex IV to Implementing Regulation (EU) 2019/317, the Commission observes that the Czech Republic's DUC trend at charging zone level of -1,3 % over RP4 outperforms the Union-wide trend of -1,2 % over the same period.
- (29) Concerning the assessment criterion set out in point 1.4(b) of Annex IV to Implementing Regulation (EU) 2019/317, the Commission observes that the Czech Republic's long-term DUC trend at charging zone level over RP3 and RP4 of +0,2 % underperforms the long-term Union-wide trend of -1,0 % over the same period.
- (30) The Commission notes, however, that the Czech Republic has lost, as a consequence of Russia's war of aggression against Ukraine, a significant share of the overflights which it historically used to serve. That traffic reduction continues over RP4 to considerably impact the cost-efficiency performance of the air navigation service provider and has, in particular, a negative effect on the long-term DUC trend of the Czech Republic.
- (31) It is therefore necessary and appropriate to examine, for the purpose of the assessment criterion referred to in recital (29), whether the Czech Republic would meet the Union-wide long-term DUC trend in the absence of the circumstances referred to in recital (30).
- (32) To this end, the Commission has recalculated the long-term DUC trend in light of the estimated structural loss of traffic for the Czech Republic as a consequence of the war in Ukraine, measured in *en route* service units. That recalculation results in an adjusted long-term DUC trend for the Czech Republic of -2,3 %, which outperforms the long-term Union-wide DUC trend of -1,0 %. Therefore, it is concluded that the Czech Republic fulfils the assessment criterion referred to in recital (29) after taking into account the effect of the significant traffic reduction resulting from the war in Ukraine.
- (33) Concerning the assessment criterion set out in point 1.4(c) of Annex IV to Implementing Regulation (EU) 2019/317, the Commission observes that the Czech Republic's baseline value for the DUC of EUR 58,10 in real terms at 2022 prices ('EUR2022') is 13,6 % higher than the average baseline value of EUR 51,14 in EUR2022 of the relevant comparator group set out in Article 7 Implementing Decision (EU) 2024/1688.
- (34) When excluding the negative impact of the traffic changes resulting from Russia's war of aggression against Ukraine, it is clear that the Czech Republic meets both the Union-wide DUC trend and the Union-wide long-term DUC trend. Therefore, the Commission considers that the deviation from the average DUC baseline for 2024 referred to in recital (33) does not preclude the Czech Republic's cost-efficiency performance targets from being consistent with the Union-wide cost-efficiency performance targets.
- (35) On the basis of the findings set out in recitals (27) to (34), the targets in the key performance area of cost-efficiency included in the draft performance plan should be considered consistent with the Union-wide performance targets for RP4.

Review of the cost-efficiency targets for terminal air navigation services

- (36) In accordance with point 2.1(c) of Annex IV to Implementing Regulation (EU) 2019/317, the Commission has complemented its assessment of the draft performance plan by reviewing the cost-efficiency performance targets for terminal air navigation services set in respect of the airports referred to in Articles 1(3) and (4) of that Implementing Regulation. It was found that those targets do not give rise to concerns.

Review of the *en route* and terminal incentive schemes

- (37) In accordance with point 2.1(f) of Annex IV to Implementing Regulation (EU) 2019/317, the Commission has complemented its assessment of the draft performance plan by reviewing the incentive schemes supporting the achievement of capacity targets ('capacity incentive schemes') referred to in Article 11 of that Implementing Regulation. It was found that the capacity incentive schemes for RP4 established by the Czech Republic for *en route* and terminal services in RP4 give rise to concerns.
- (38) The Commission notes that both the *en route* capacity incentive scheme and the terminal capacity incentive scheme included in the draft performance plan comprise a maximum financial disadvantage amounting to merely 0,75 % of the determined costs. Having regard to the expert advice provided by the PRB, the Commission considers that that the maximum financial disadvantages for the capacity incentive schemes set out by the Czech Republic do not comply with Article 11(3), point (a), of Implementing Regulation (EU) 2019/317, which requires such incentive schemes to have '*a material impact on the revenue at risk*'.
- (39) Therefore, the Czech Republic should revise, in connection with the adoption of its final performance plan pursuant to Article 16, point (a), of Implementing Regulation (EU) 2019/317, its capacity incentive schemes in order for the maximum financial disadvantage stemming from those incentive schemes to be set at a level having a material impact on the revenue at risk, as required in Article 11(3), point (a) of Implementing Regulation (EU) 2019/317. In the Commission's view, that revision should lead to a maximum financial disadvantage equal to or higher than 1 % of the annual determined costs.

CONCLUSIONS

- (40) In the light of the foregoing, the performance targets included in the draft performance plan of the Czech Republic should be considered consistent with the Union-wide performance targets for RP4,

HAS ADOPTED THIS DECISION:

Article 1

The performance targets included in the draft performance plan submitted by the Czech Republic for the fourth reference period ('RP4'), listed in the Annex to this Decision, are consistent with the Union-wide performance targets for RP4 set out in Implementing Decision (EU) 2024/1688.

Article 2

This Decision is addressed to the Czech Republic.

Done at Brussels, 19 May 2025.

For the Commission
Apostolos TZITZIKOSTAS
Member of the Commission

ANNEX

Performance targets included in the draft performance plan of the Czech Republic, found to be consistent with the Union-wide performance targets for the fourth reference period

KEY PERFORMANCE AREA OF SAFETY

Czech Republic	Targets on the effectiveness of safety management, expressed as a level of implementation, ranging from European Aviation Safety Agency (EASA) level A to D					
Air navigation service provider	Safety management objective	2025	2026	2027	2028	2029
ANS CR	Safety policy and objectives	C	C	C	C	C
	Safety risk management	C	C	C	C	D
	Safety assurance	B	C	C	C	C
	Safety promotion	C	C	C	C	C
	Safety culture	C	C	C	C	C

KEY PERFORMANCE AREA OF ENVIRONMENT

Czech Republic	2025	2026	2027	2028	2029
Targets in the key performance area of environment, expressed as the average horizontal <i>en route</i> flight efficiency of the actual trajectory	2,54 %	2,52 %	2,49 %	2,45 %	2,43 %

KEY PERFORMANCE AREA OF CAPACITY

Czech Republic	2025	2026	2027	2028	2029
Targets in the key performance area of capacity, expressed in minutes of <i>en route</i> ATFM delay per flight	0,19	0,14	0,11	0,10	0,10

KEY PERFORMANCE AREA OF COST-EFFICIENCY

En route charging zone of Czech Republic	2019 baseline value	2024 baseline value	2025	2026	2027	2028	2029
Targets and baseline values in the key performance area of cost-efficiency, expressed as determined unit cost (in real terms at 2022 prices)	CZK 1 315,2	CZK 1 425,1	CZK 1 426,6	CZK 1 425,3	CZK 1 393,9	CZK 1 383,9	CZK 1 336,2
	EUR 53,62	EUR 58,10	EUR 58,16	EUR 58,11	EUR 56,82	EUR 56,42	EUR 54,47
