

Coal Production and Dispatch from Captive and Commercial Mines in April 2025 Shows Robust Growth Compared to Last Year

Posted On: 02 MAY 2025 2:58PM by PIB Delhi

Coal production from captive and commercial mines in the country stood at 14.01 million tonnes (MT) in April 2025, while coal dispatch was recorded at 16.81 million tonnes (MT), reflecting a robust start to FY 2025–26.

This marks a notable year-on-year growth compared to April figures from FY 2023- 24 and FY 2022-23, underlining the sector's upward trajectory. The attached graph clearly illustrates the consistent performance improvement across three consecutive years, with both production and dispatch showing strong gains.

The Ministry attributes this success to continuous policy interventions, close monitoring, and handholding of stakeholders to fast-track operational clearances and enhance production capacity. One of the key contributors to this achievement is the commencement of operations in newly developed coal blocks:

- Kotre Basantpur Pachmo block of M/s Central Coalfields Limited (CCL), with a Peak Rated Capacity (PRC) of 5 MT per annum (opencast), started operations on 15 April 2025.
- Naini coal block of M/s Singareni Collieries Company Limited (SCCL), with a PRC of 10 MT per annum (opencast), commenced operations on 16 April 2025.

Going forward, the Ministry of Coal reaffirms its commitment to unlocking the full potential of captive and commercial coal mining in India. The focus remains on ensuring seamless production, minimizing supply disruptions, and contributing significantly to the country's growing energy demand.
