

Bid submission timeline extended for SECI's Green Ammonia tender under National Green Hydrogen Mission

Posted On: 25 JUN 2025 12:56PM by PIB Delhi

The Solar Energy Corporation of India Limited (SECI), a Navratna Central Public Sector Enterprise functioning under the Ministry of New and Renewable Energy, Government of India, has extended the bid submission date for its ongoing tender pertaining to the production and supply of green ammonia. The revised last date for bid submission is 30 June 2025.

Issued on 7th June 2024, the tender is part of the Strategic Interventions for Green Hydrogen Transition (SIGHT) Scheme - Mode 2A, Tranche I, and is aimed at enabling the production and long-term supply of 7,24,000 metric tonnes of green ammonia annually to 13 identified fertiliser plants across the country.

SECI, as the implementing agency, will aggregate demand and enter into long-term offtake agreements with selected green ammonia producers. These agreements will provide commercial certainty for 10 year duration and support market development for green hydrogen derivatives.

For more details please visit the Tenders section on SECI's official website: <https://www.seci.co.in/tenders>.
