Pradhan Mantri National Dialysis Program (PMNDP) is implemented in all the 36 States/UTs in 751 districts in the country. There is a total of 1,704 centres operational as on 30th June 2025.

Government of India has recommended setting up of Haemodialysis centres in all the district hospitals initially and on saturation scale down till the Community Health Centres (CHCs) at the taluka level. This is done by the States/UTs as per the dialysis demand and gap assessment. National Health Mission (NHM) supports States/UTs in implementation of Haemodialysis and Peritoneal Dialysis services under PMNDP program based on the gap assessment done by the State/UTs through the annual Programme Implementation Plans. States/UTs are financially supported for establishing dialysis services to all the population of the States/UTs including in remote and tribal areas.

The Union Minister of State for Health and Family Welfare, Shri Prataprao Jadhav stated this in a written reply in the Lok Sabha today.
