

ALIMCO Marks 53rd Foundation Day and Unveils New Logo and Next-Generation Mobility Solutions for Divyangjan

प्रविष्टि तिथि: 30 NOV 2025 7:10PM by PIB Delhi

The Artificial Limbs Manufacturing Corporation of India (ALIMCO) today marked its 53rd Foundation Day with a renewed commitment to inclusion, dignity and technological excellence. The occasion was commemorated by the unveiling of ALIMCO's new corporate logo and the launch of two advanced mobility solutions — the 3-Wheeler EV Scooter for Divyangjan and Senior Citizens and the Clip-on Motorised Wheelchair — in the august presence of Hon'ble Union Minister for Social Justice & Empowerment, Dr Virendra Kumar, and Hon'ble Minister of State, Shri B. L. Verma.

Speaking at the event, Dr. Virendra Kumar reflected on ALIMCO's transformative journey, stating that in its 53 years of service, the organisation has grown from a manufacturing unit into a national institution that symbolises innovation with empathy. He noted that under the leadership of Hon'ble Prime Minister Shri Narendra Modi, more than 32 lakh Divyang beneficiaries have been supported through various government initiatives, and ALIMCO continues to play a pivotal role in ensuring that high-quality assistive devices reach every deserving individual across the country.

Shri B. L. Verma, Minister of State for Social Justice & Empowerment, described the occasion as more than a milestone, calling it a celebration of compassion and collective purpose. He observed that the newly launched devices are not merely products of engineering but powerful enablers of independence, dignity and mobility, reflecting India's growing leadership in inclusive and accessible technology.

At the heart of the occasion was the deeply moving address delivered by Smt Manmeet Kaur Nanda, Additional Secretary, Department of Empowerment of Persons with Disabilities, who highlighted that ALIMCO must be viewed not just as a production organisation, but as a living institution that carries forward India's vision of self-reliance, inclusion and social justice.

She described the day as one of profound significance, with the unveiling of the new logo and the launch of the two mobility innovations marking a new chapter in ALIMCO's journey. She spoke of how the organisation's work is ultimately defined not by machines, but by the lives it touches.

Recalling the stories showcased in the film presented during the programme, she referred to Ms. Sarita Trivedi, a triple amputee and an inspiration to the nation in the field of art, and a BSF officer who, despite the loss of his limbs and medical advice to withdraw from active life, went on to defeat the World No. 1 para-badminton player from Indonesia.

Sharing the officer's words with the audience, she said, "Limbs are optional, but courage is compulsory."

In an emotional and heartfelt tribute, Smt. Nanda expressed her deep gratitude to ALIMCO's officers, employees, workmen and staff, acknowledging their unseen but relentless dedication. She said that it is their collective effort that brings such inspiring individuals into national consciousness and restores hope to countless families.

She further highlighted ALIMCO's forward-looking vision, including collaboration with over 80 start-ups, technology transfer agreements, expansion into AI-assisted and smart digital assistive technologies, and the development of advanced, affordable and high-quality aids and appliances for persons with disabilities across the country.

She concluded by stating that every device bearing the new ALIMCO logo will not only represent innovation, but also carry a message of compassion, responsibility and inclusion — a promise that no citizen will be left behind in India's journey of progress.

Introducing the new corporate identity, Shri Praveen Kumar, Chairman and Managing Director, ALIMCO, said the new purple logo symbolises dignity, inclusion and engineering brilliance, reflecting the organisation's renewed focus on modern solutions, faster delivery and enhanced impact.

He added that with the integration of EV mobility, advanced prosthetics and next-generation assistive devices, ALIMCO is better positioned than ever to respond to emerging needs with quality, sensitivity and speed.

Key Features of the Newly Launched Products:

The 3-Wheeler EV Scooter for Divyangjan and Senior Citizens features a highly stable and ergonomic design, is eco-friendly with low maintenance requirements, and is easy to manoeuvre in crowded and urban environments.

The Clip-on Motorised Wheelchair transforms a manual wheelchair into a motorised unit, operates on a rechargeable lithium-ion battery, offers a range of up to 25 kilometres per charge, and is equipped with enhanced braking and reverse-gear functionality.

The commemorative programme was attended by senior officials of the Ministry, representatives of disability organisations, technical experts, beneficiaries and members of ALIMCO's leadership, reaffirming a shared national commitment to a more accessible, empowered and inclusive India.
