

AIT PUNE CONFERRED NATIONAL IEI AWARD FOR ENGINEERING EDUCATION EXCELLENCE

प्रविष्टि तिथि: 20 DEC 2025 5:36PM by PIB Mumbai

The Army Institute of Technology, Pune has been conferred with the Engineering Education Excellence Award 2025 by the Institution of Engineers (India) (IEI), marking a significant national endorsement of its sustained contribution to quality engineering education. The award, instituted by India's apex professional body for engineers, recognizes institutions that demonstrate consistent academic excellence, innovation and alignment with national priorities.

The award was presented on 19 December 2025 at the National Institute of Technology, Durgapur, during a national-level ceremony attended by eminent academicians, industry leaders and representatives of leading engineering institutions. The recognition places AIT Pune among a select group of institutions that have met IEI's rigorous benchmarks for engineering education.

This conferment reflects AIT Pune's long-standing emphasis on academic rigour, modern pedagogical practices, faculty development and strong industry engagement. Over the years, the institute has developed a disciplined and outcomes-oriented learning environment that combines technical competence with ethics, values and professional responsibility. These attributes are increasingly vital in a technology-driven economy.

Established under the aegis of the Army Welfare Education Society (AWES), AIT Pune occupies a unique position in India's higher education ecosystem. While operating within a civilian academic framework, the institute benefits from institutional ethos shaped by discipline, integrity and service, contributing to the development of industry-ready and socially responsible engineers. The impact of this approach is evident in the performance of its graduates, who today contribute across industry, research, entrepreneurship and national development initiatives. Their professional success underscores the role of institutions like AIT Pune in strengthening India's technical manpower base.

Beyond the immediate recognition, the IEI award serves as validation of a sustained institutional journey rather than a standalone achievement. It also reinforces the responsibility on the institute to continue raising academic standards, deepen industry-academia collaboration and expand its contribution to innovation and research.

As India advances towards greater technological self-reliance and innovation-led growth, the recognition accorded to AIT Pune highlights the importance of steady, values-driven excellence in engineering education, an investment whose returns are ultimately measured in national capability and societal progress.
