

NFRA- IndiaAI launch Financial Reporting Compliance Challenge to solicit AI power solutions

प्रविष्टि तिथि: 14 JAN 2026 7:39PM by PIB Delhi

The National Financial Reporting Authority (NFRA), in partnership with IndiaAI, has launched the IndiaAI Financial Reporting Compliance Challenge to solicit AI- powered solutions that help in monitoring financial reporting quality and speed up internal tasks.

The initiative invites Indian companies and DPIIT-recognized startups to develop an advanced engine capable of extracting data from multi-format documents and validating them against frameworks. Participants will compete for a total prize pool of ₹1.5 Crore, with up to ten teams receiving ₹5 Lakhs each during a virtual refinement stage and one winner potentially securing a two-year contract with NFRA worth up to ₹1 Crore for national-scale deployment.

The challenge seeks to produce explainable compliance validation reports, automated analytics for risk indicators, and an AI-enabled insight bot to support the NFRA's mission of safeguarding public trust and investor interests. Applications are currently open and will close on February 22, 2026.
