

DGCA Launches Electronic Personnel Licence Services for Airline Transport Pilot Licence

प्रविष्टि तिथि: 21 JAN 2026 7:42PM by PIB Delhi

The Directorate General of Civil Aviation (DGCA) launched the Electronic Personnel Licence (EPL) services for Airline Transport Pilot Licence (ATPL) in an event held at DGCA Headquarters here today. The EPL ATPL service was inaugurated by the DGCA, marking an important milestone in its digital transformation journey.

Speaking on the occasion, DG (CA) highlighted that the EPL initiative is a key step towards strengthening India's civil aviation regulatory ecosystem through secure, modern and future-ready digital systems. The DG (CA) congratulated the DGCA teams and technology partners for their efforts in implementing this initiative and acknowledged the cooperation extended by the aviation industry and stakeholders in adopting the new system.

The Electronic Personnel Licence is a secure digital licence incorporating ICAO-aligned security features to ensure authenticity, prevent tampering, and enable real-time verification. The EPL can be accessed through the eGCA mobile application.

The DGCA had initiated the roll-out of EPL in February 2025, starting with Commercial Pilot's Licence (CPL) and Flight Radio Telephone Operator's (Restricted) Licence (FRTOL). With the launch of the EPL services for ATPL, the DGCA further strengthens its commitment towards enhanced efficiency, transparency and improved service delivery for the aviation sector.
