

PLASTINDIA 2026: One of the World's Largest Plastics Exhibitions to Begin Tomorrow in New Delhi

Posted On: 04 FEB 2026 8:25PM by PIB Delhi

PLASTINDIA 2026, one of the world's premier plastics exhibitions, is set to commence tomorrow, February 5, 2026, at Bharat Mandapam, New Delhi.

Running until February 10, the 2026 edition of this global event is organized with the support of the Department of Chemicals and Petrochemicals, the Ministry of Commerce and Industry and Ministry of Micro, Small and Medium Enterprises of India

Under the theme "Bharat Next," the PLASTINDIA 2026 exhibition aligns with the Hon'ble Prime Minister's vision of Atmanirbhar Bharat and Viksit Bharat. It focuses on building a self-reliant industrial base to drive manufacturing-led growth and large-scale employment.

Over 2,000 international exhibitors will showcase cutting-edge innovations in machinery, raw materials, and circular economy solutions at the event.

The event highlights India's strength in Men, Material, Machine, and Markets, while revolving around the strategic pillars of Trade, Technology, Talent, Tradition, and Tourism.

For the first time, PLASTINDIA is envisaged as a Zero Waste exhibition. All solid waste generated at the venue will be segregated, recycled, and reused, ensuring zero contribution to landfills.

A dedicated space for youth, innovators, and start-ups will showcase sustainable plastic solutions, recognizing their role in the industry's future.

A unique museum will demonstrate the versatility of plastics and their critical role in agriculture, healthcare, water management, and mobility when managed responsibly.

The Indian plastic industry is currently valued at approximately ₹3–3.5 lakh crore, with a trajectory aimed at significant future growth.

As India moves toward a USD 10 trillion economy, the plastics sector remains a vital contributor, supporting infrastructure, consumer goods, and the global supply chain.
