

PM to inaugurate Seva Teerth and Kartavya Bhavan-1 & 2 on 13th February

Inauguration marks a transformative milestone in India's administrative governance architecture

Seva Teerth houses the Prime Minister's Office, the National Security Council Secretariat, the Cabinet Secretariat

Kartavya Bhavan-1 & 2 house several key ministries, including the Ministry of Finance, Defence, Health & Family Welfare, Education among others

Posted On: 12 FEB 2026 12:02PM by PIB Delhi

Prime Minister Shri Narendra Modi will unveil the name of the building complex Seva Teerth on 13th February, 2026 at around 1:30 PM. Prime Minister will thereafter formally inaugurate Seva Teerth and Kartavya Bhavan-1 & 2 and also address a public programme at Seva Teerth at around 6 PM.

The inauguration marks a transformative milestone in India's administrative governance architecture and reflects the Prime Minister's commitment to building a modern, efficient, accessible and citizen-centric governance ecosystem.

For decades, several key government offices and ministries functioned from fragmented and ageing infrastructure spread across multiple locations in the Central Vista area. This dispersion led to operational inefficiencies, coordination challenges, escalating maintenance costs and sub-optimal working environments. The new building complexes address these issues by consolidating administrative functions within modern, future-ready facilities.

Seva Teerth houses the Prime Minister's Office, the National Security Council Secretariat, the Cabinet Secretariat, all of which were previously located across different locations.

Kartavya Bhavan-1 & 2 accommodate several key ministries, including the Ministry of Finance, Ministry of Defence, Ministry of Health & Family Welfare, Ministry of Corporate Affairs, Ministry of Education, Ministry of Culture, Ministry of Law & Justice, Ministry of Information & Broadcasting, Ministry of Agriculture & Farmers Welfare, Ministry of Chemicals & Fertilizers and Ministry of Tribal Affairs.

Both building complexes feature digitally integrated offices, structured public interface zones and centralized reception facilities. These features will foster collaboration, efficiency, seamless governance, improved citizen engagement and enhanced employee well-being. Designed in accordance with 4-Star GRIHA standards, the complexes incorporate renewable energy systems, water conservation measures, waste management solutions and high-performance building envelopes. These measures significantly

reduce environmental impact while enhancing operational efficiency. The building complexes also include comprehensive safety and security frameworks, such as smart access control systems, surveillance networks and advanced emergency response infrastructure, ensuring a secure and accessible environment for officials and visitors.
