

Need for enhanced financial and infrastructure support for full operationalisation of Kakatiya Mega Textile Park in Warangal, Telangana.-laid

DR. KADIYAM KAVYA (WARANGAL): I wish to draw the attention of the Government to the need for enhanced Central incentives and policy support for the Kakatiya Mega Textile Park (KMTP) in Warangal, Telangana. The park was established to create an integrated textile value chain and generate large-scale employment. Warangal has a strong cotton production base and skilled workforce, positioning it as a potential textile and apparel hub. However, the pace of private investment and establishment of anchor units remains below potential. In view of increasing input costs and intense competition in the textile sector, additional Central support is essential to ensure the park achieves its intended scale and employment targets. Consideration may be given to extending or enhancing coverage under the Production Linked Incentive (PLI) Scheme, providing special fiscal or viability gap support, strengthening assistance under the SAMARTH Scheme for skill development, inclusion of park under expanded PM MITRA or other cluster-based incentives, and enhancing export promotion support. Targeted incentives will accelerate investment inflow, attract anchor investors and boost employment for local youth and women in Telangana. I therefore urge the Government to grant additional fiscal and policy and infrastructure support to ensure full operationalization of KMTP.
