

Regarding need to construct a Railway Over Bridge instead of
Railway Under Bridge at level crossing No. 109 in Delhi
Saharanpur Railway Line-Laid

1. The Government of India, Ministry of Railways, has been requested to consider the need for constructing a Railway Over Bridge (ROB) instead of the existing Railway Under Bridge at level crossing No. 109 in Delhi Saharanpur Railway Line-Laid.

2. The level crossing is situated at the intersection of the Saharanpur Railway Line and the Delhi Saharanpur Railway Line. The existing Railway Under Bridge is a single track bridge, which is not sufficient for the increasing traffic volume.

3. The proposed ROB is a double track bridge, which will provide a more efficient and safe crossing for the increasing traffic volume. The ROB will also provide a more scenic view of the surrounding area.

4. The estimated cost of the ROB is Rs. 100 crores. The Government of India, Ministry of Railways, has been requested to consider the need for constructing the ROB.

5. The Government of India, Ministry of Railways, has been requested to consider the need for constructing the ROB.

6. The Government of India, Ministry of Railways, has been requested to consider the need for constructing the ROB.

7. The Government of India, Ministry of Railways, has been requested to consider the need for constructing the ROB.

8. The Government of India, Ministry of Railways, has been requested to consider the need for constructing the ROB.

9. The Government of India, Ministry of Railways, has been requested to consider the need for constructing the ROB.

10. The Government of India, Ministry of Railways, has been requested to consider the need for constructing the ROB.
