The diagram shows a 16-bit bus structure. The top row consists of 16 black squares. The bottom row consists of 16 squares: the first 10 are black, and the last 6 are blue. A blue line runs horizontally above the bottom row, starting from the left edge and ending at the 10th square. A black line runs horizontally below the bottom row, starting from the left edge and ending at the 16th square. Below the black line, the text "? (■■■■■■■■)" is centered, indicating a 10-bit data bus. The blue squares and the line above them represent a 6-bit address bus.
