Prime Minister Shri Narendra Modi chaired the 52nd meeting of PRAGATI, the ICT-enabled, multi-modal platform aimed at fostering Pro-Active Governance and Timely Implementation, by seamlessly integrating efforts of the Central and State Governments, earlier today at Seva Teerth.

During the meeting, the Prime Minister reviewed four critical infrastructure projects across the Road, Power, Industrial Corridor and Metro Rail sectors, covering four States and costing around ₹30,000 crore. These projects, important for economic growth, regional connectivity, industrial development and public welfare, were reviewed with focus on timelines, inter-agency coordination, issue resolution and timely completion.

Prime Minister underlined that delays in infrastructure projects not only lead to cost escalation, but also deprive people and industries of timely benefits. He asked the concerned Ministries and State Governments to resolve pending issues in a mission-mode manner and ensure close monitoring at the highest level.

Prime Minister emphasised the use of PM GatiShakti National Master Plan for efficient planning and timely implementation of infrastructure projects. He also underlined the need for regular and timely updation of project details, utilities, infrastructure layers, clearances and other field-level information on the portal. He further emphasised that the platform must reflect the latest ground situation so that bottlenecks can be identified in advance, inter-agency coordination can be improved and decisions can be taken on the basis of reliable, real-time data.

Prime Minister reviewed TB Mukht Bharat Abhiyan and emphasised the need to leverage latest digital technologies including Artificial Intelligence. He suggested a team of NCC cadets and MY Bharat volunteers, for awareness, patient follow-up and community mobilisation.

Prime Minister also reviewed grievances related to Cyber Crime and Digital Arrest. He expressed concern over the rising misuse of digital platforms to defraud citizens and stressed that such matters require coordinated, sensitive and time-bound handling by all concerned agencies. He noted that citizens should not be made to run from one department or agency to another. He also emphasized the need for clear ownership, faster response, better coordination among law enforcement agencies, banks and digital platforms, and stronger public awareness campaigns.

Prime Minister observed that in cases involving cyber fraud, timely action is crucial to prevent financial loss and restore public confidence. He asked all stakeholders to work in close coordination to strengthen prevention, reporting, investigation and grievance redressal mechanisms. He also emphasised that States should work towards enabling e-Zero FIR mechanisms for faster registration and response in cyber fraud cases.
