

Sarbananda Sonowal Hails SCI as Anchor of India's Maritime & Shipbuilding Ambitions

Union Minister hails Shipping Corporation of India's growth from 19 vessels to a 5.26-million-DWT fleet, ties its expansion to Maritime Amrit Kaal Vision 2047

Posted On: 02 OCT 2026 9:55PM by PIB Delhi

Union Minister of Ports, Shipping and Waterways (MoPSW) Sarbananda Sonowal called on the Shipping Corporation of India (SCI) to take a leading role in India's drive toward self-reliant, globally competitive shipbuilding and maritime capacity, as the company marked 65 years of operations at a ceremony at the International Cruise Terminal, Mumbai today.

Sarbananda Sonowal, who attended as the chief guest at the event, congratulated SCI on completing six and a half decades of service to the nation and highlighted the company's role in safeguarding India's energy and trade security, pointing specifically to its performance during the recent Strait of Hormuz crisis. The Union Minister called on SCI to help advance the government's Viksit Bharat and Atmanirbhar Bharat goals, framing a stronger national fleet as central to India's ambition of becoming a top shipbuilding and ship-owning nation by 2047.

"SCI is one of the clearest examples of India building its own strength at sea," Sonowal said. "As India works to become a top shipbuilding nation under Maritime Amrit Kaal Vision 2047, SCI's fleet, its people and its partnerships will be central to that mission."

Founded in 1961 as a liner shipping company with 19 vessels, SCI has grown into a diversified maritime enterprise operating 58 vessels totalling 5.26 million deadweight tonnage (DWT). The company's operations now span crude and product tankers, bulk and container shipping, LPG and LNG carriers, offshore services, passenger and coastal transport, project cargo, ship management, and shipbuilding consultancy.

"Under the visionary leadership of Prime Minister Narendra Modi, India is no longer content to simply own ships, we are determined to build them, right here at home. SCI's growth over these decades shows what Indian enterprise can achieve when backed by national resolve. As SCI expands its fleet and deepens its partnerships, it strengthens not just one company, but India's entire shipbuilding ambition, and carries us forward, mile by mile, toward the goal of a Viksit Bharat," **Sarbananda Sonowal** said.

Nitesh Narayan Rane, Maharashtra's Minister for Fisheries and Ports and Guest of Honour at the event, credited SCI's enduring ties to Maharashtra and Mumbai, and said a strong shipping ecosystem remained essential to trade, employment and the broader growth of India's maritime economy.

Capt. B.K. Tyagi, SCI's chairman and managing director, outlined the company's plans for the years ahead, reaffirming its commitment to building a larger, modern and globally competitive fleet in support of the national push to expand India's shipping capacity and tonnage.

SCI is undertaking a fleet augmentation program backed by the government's expanded policy and financing support for the maritime sector, with proposed joint ventures involving Indian Oil's public sector undertakings and the Bharat Container Shipping Line laying the groundwork for accelerated expansion toward MAKV 2047 targets.

SCI is positioned to play a central role in strengthening India's maritime capacity, supporting the country's economic and energy security, and contributing to its broader shipbuilding and tonnage ambitions, as the company enters its next phase of growth toward a Viksit Bharat and Atmanirbhar Bharat.
