

Prime Minister shares an article highlighting India's energy transition, wider access and energy security

Posted On: 07 OCT 2026 12:43PM by PIB Delhi

The Prime Minister, Shri Narendra Modi, today shared an article highlighting India's energy story under the Prime Minister's leadership, marked by wider access, faster renewable growth and greater energy security.

The article outlines how, from electricity and clean cooking to solar, nuclear power and biofuels, India is steadily building a more diverse and robust energy system while playing a bigger role in global energy trade and technology.

The Prime Minister's Office posted on X:

"India's energy story under PM @narendramodi is one of wider access, faster renewable growth and greater energy security.

From electricity and clean cooking to solar, nuclear power and biofuels, India is steadily building a more diverse and stronger energy system.

The journey is also giving India a bigger role in global energy trade and technology."
