

Release of Draft Guideline for Compilation Gross State Domestic Product (GSDP) Estimates by Expenditure Approach with Base Year 2022-23

Posted On: 09 OCT 2026 4:48PM by PIB Delhi

The National Statistics Office (NSO), Ministry of Statistics & Programme Implementation (MoSPI), Government of India, has prepared the draft guideline for Compilation of Gross State Domestic Product (GSDP) Estimates from Expenditure Side with Base Year 2022-23. The guideline is being released and uploaded on the official website of MoSPI (link attached below).

The draft guideline provides a uniform and comprehensive framework for compilation of GSDP estimates from the expenditure side across States and Union Territories, with the objective of ensuring consistency, comparability and methodological standardization under the revised base year framework.

The draft guideline elaborates the concepts, coverage, data sources, estimation procedures and methodologies for compilation of GSDP from the expenditure side, covering the major expenditure components, including Private Final Consumption Expenditure (PFCE), Government Final Consumption Expenditure (GFCE), Gross Fixed Capital Formation (GFCF), Changes in Inventories, Valuables and Net Exports. At present, some States/UTs are compiling estimates of GFCF and GFCE; however, PFCE estimates are not being compiled by any State/UT. The document, therefore, provides a comprehensive framework and methodological guidance to facilitate the compilation of these expenditure components at the State/UT level.

The guideline emphasizes the use of State-specific data sources and appropriate allocation indicators for estimation of various expenditure components, to the extent feasible. In cases where direct State-level data are not available, suitable allocation methodologies and relevant indicators have been recommended for deriving State-wise estimates in a consistent and comparable manner.

The compilation of GSDP from the expenditure side provides an important complementary approach to the production/income-side estimation of GSDP and would facilitate a comprehensive assessment of economic activity at the State/UT level. The estimates would

also contribute towards strengthening the State-level national accounts framework and improving the consistency of State estimates with the methodology followed at the national level.

The release of draft guideline is an important step towards harmonization of estimation practices across States/UTs and strengthening the statistical capacity of State Directorates of Economics and Statistics (DESS) for the compilation of expenditure-side GSDP estimates.

The draft Guideline is available on the official website of MoSPI (<https://www.mospi.gov.in/product/more/6-Documents>) for wider dissemination and feedback from stakeholders by 28th October, 2026
