Mumbai, 12 November 2026

The NPC Staff Club of Nuclear Power Corporation of India Limited (NPCIL) is organising its maiden Two-Wheeler Nuclear Awareness Rally on November 21, 2026, as part of its efforts to promote public awareness about nuclear energy and its role in India's sustainable development.

The 60-km rally, scheduled to be flagged off from Anushakti Nagar, Mumbai, by senior officials of the Department of Atomic Energy (DAE), NPCIL and Bhabha Atomic Research Centre (BARC), will be held in the presence of senior officers from various constituent units. Employees of NPCIL and their family members will participate in the rally, carrying informational messages to disseminate factual information about nuclear energy among the general public. The rally will proceed to Khopoli.

The initiative is aimed at building an informed society by educating citizens about the safety, reliability, environmental benefits and long-term sustainability of nuclear power. It seeks to promote a better understanding of nuclear energy through factual information and public engagement.

The NPC Staff Club serves as a platform for organising and promoting sports, cultural and recreational activities while encouraging the talents of NPCIL employees and their family members. The club has also undertaken several initiatives towards employee welfare. As part of its broader outreach efforts,

the club has committed to promoting public awareness about nuclear power and its various aspects.

NPCIL and its constituent units have been undertaking a comprehensive, multi-pronged public outreach programme to reach millions of stakeholders across the country. These initiatives include permanent facilities such as Halls of Nuclear Power, Miniature Nuclear Galleries, working models of nuclear power plants at district science centres, exhibitions, including mobile exhibitions, awareness stalls, plant site visits, lectures, seminars and social media campaigns.

A science-informed society is one of the key enabling pillars for achieving India's ambitious target of 100 GW of installed nuclear power capacity by 2047, in alignment with the vision of Viksit Bharat. The maiden Two-Wheeler Nuclear Awareness Rally is another step towards strengthening public understanding and awareness of nuclear energy and its contribution to India's clean energy transition.
